

# Proteus Waterproofing

## Case Study: Proteus Pro-System®

### IQ Mouldings, Rochdale

#### Project Brief:

IQ Mouldings, a warehouse unit located in Rochdale required refurbishment works to the main roof as the existing asphalt had passed its serviceable life, causing water ingress into the building. To prevent further damage, **Proteus Waterproofing** were asked to supply a high-quality waterproofing solution to extend the life of the roof, therefore, **Proteus Pro-System®** was specified.

#### Key Requirements: High Performance Waterproofing

As the roof was difficult to access, a cold applied liquid system was essential. **Proteus Pro-System®** was overlaid onto the existing asphalt to provide a seamless, robust finish, extending the life of the roof for a further 20 years. **Proteus Waterproofing** worked closely with the **Approved Contractor** to ensure the project was successfully delivered to a very high standard, providing the client with a long-lasting solution

#### Key Requirements: Health & Safety

**Proteus Pro-System®** is a low noise waterproofing solution meaning the warehouse could continue to operate while the works were being completed. The cold application removed the need for hot works, which is crucial when working on roofs that are difficult to access. **Proteus Waterproofing's** cold applied liquids remove the risk of fire to buildings allowing the **Approved Contractor** to complete the works safely, while meeting all health and safety criteria.

#### Key Requirements: Long Term Performance

**Proteus Pro-System®** offers a low maintenance, durable waterproofing and protection solution for a range of new build and refurbishment applications. It is cold applied, eliminating the risk of fire and once cured, provides a completely seamless waterproof protection and has excellent UV stability, making it suitable to use in all climates. **Proteus Pro-System®** forms a seamless, fully adhered membrane, is manufactured in the UK, and is **BBA Certified**.
