

Proteus Waterproofing

Case Study: Proteus Pro-System® Plus

Roof Refurbishment, Apothecaries Hall, London

Project Brief:

Apothecaries Hall, the oldest standing livery hall in London, required a new waterproofing membrane for the roof. The client requested a system that would be quick to install as exams take place on a regular basis. Therefore **Proteus Pro-System® Plus** was selected, to meet the client's requirements.

Key Requirements: Health & Safety

Due to the age and importance of the building, the system needed to be cold applied, as the building also housed many antiques and high value paintings. **Proteus Pro-System® Plus** is also low odour, which meant disruptions were kept to a minimum and the planned events could continue as scheduled.

Key Requirements: High Performance Waterproofing

Due to the volume of plant equipment on the roof and the works being carried out in tight spaces, **Proteus Pro-System® Plus** was the perfect system to install as it can be easily moulded. Pre-formed **Proteus Pro-System® Plus** was slid under low set plant equipment meaning the equipment did not need to be raised or switched off. **Proteus Waterproofing** worked closely with the **Proteus Approved Contractor, DH Liquid Coatings Ltd.** to ensure the project was completed to a high standard.

Key Requirements: Seamless Waterproofing

Proteus Pro-System® Plus offers a low maintenance, durable waterproofing and protection solution for a range of new build and refurbishment applications. It is cold applied, eliminating the risk of fire and once cured, provides a completely seamless waterproof protection and has excellent UV stability, making it suitable to use in all climates. **Proteus Pro-System® Plus** forms a seamless, fully adhered membrane, **manufactured in the UK** and is **BBA Certified**.
