# PRO-METAL SPOT PRIMER

Product Datasheet v1.1 | July 2025

### PRODUCT DETAILS

Product name Pro-Metal Spot Primer

Product type Metal primer

#### PRODUCT DESCRIPTION

**Pro-Metal Spot Primer** is an alkyd based, quick drying bonding agent with moisture resistant and corrosion protection properties, used on metal surfaces to promote adhesion of Proteus Waterproofing liquid applied membranes.

#### **APPLICATION**

**Pro-Metal Spot Primer** is designed for airless or conventional applications on the following surfaces:

Mild steel
 Aluminium

Shot blasted steel
 Galvanised steel

**Pro-Metal Spot Primer** is suitable for use with the following waterproofing membranes:

Cold Melt<sup>®</sup>
 Pro-BW Plus<sup>®</sup>

Proteus Pro-Cold® • Pro-BW LO®

#### INSTALLATION

#### Substrate preparation

- Surfaces must be clean, dry, and free from grease, oil, and dust
- Remove all friable material and other contamination prior to installation
- Adhesion on substrates may be improved by scuffing the surface with a fine grade abrasive hand pad
- Ideal substrate temperature should be 5°C or above during installation and curing process

### **Product preparation**

Pro-Metal Spot Primer should be shaken thoroughly for a minimum of 15 - 20 seconds prior to use

#### Installation method

- Apply a thin coat of Pro-Metal Spot Primer to a recommended coverage rate of 0.1 L/m² at 55 microns (dry film thickness) or 0.2 L/m² at 100 microns (wet film thickness)
- It is recommended to apply 1 to 2 coats of Pro-Metal Spot Primer
- Flash off time between coats is 10 15 minutes
- Recoating/overcoating time should be a minimum of 1 hour at 20°C
- Wet film thickness is 100 microns. Dry film thickness is 55 microns

Drying time after application @ 20°C				
Touch dry	20 – 30 minutes			
Hard Dry	3 hours			
Full Dry	24 hours

# Pro-Metal **SPOT PRIMER**

# TECHNICAL INFORMATION

Characteristic	Value	Unit	
Ignition temperature	500	°C	
Flash point	24	°C	
Density @ 20°C	1.4	g/cm³	
Vapour pressure @ 20°C	6.7 – 8.2	hPa	
Viscosity - dynamic @ 20°C	200	mPas	
Solids by volume	55	%	
Maximum VOC content	0.450	Kg/L	
Initial boiling point and boiling range	137 - 143	°C	

# SIZE AND COLOUR

Product Code	<b>Height</b>	<b>Diameter</b> cm	<b>Volume</b> ml	<b>Weight</b> g	Colour
PRMESP01	20	7	400	450	Light Grey

# SHELF LIFE AND HANDLING

- Shelf life is 12 months from delivery date when kept in original sealed containers
- Store in temperatures between 5 25 °C

#### MATERIAL

Modified zinc phosphate.

#### PACKAGING

Supplied in aerosol cans.

# LIMITATIONS OF USE

For professional use only.

Substrate and ambient temperature should not be below 5°C or above 40°C.

# CHEMICAL PROPERTIES, SAFETY GUIDANCE AND DISPOSAL

Please refer to Pro-Metal Spot Primer Safety Datasheet.

#### GUARANTEES

Defects arising from lack of maintenance or abnormal use may fall outside of the cover of the Proteus Waterproofing guarantee.

# GUIDELINES AND STANDARDS

It is the responsibility of the Contractor to thoroughly familiarise themselves with all relevant Codes of Practice and Building Regulations to the works or referred in the specification.

Proteus Waterproofing take no responsibility for misinterpretation or lack of knowledge for third parties.

The works shall be carried out in accordance with the requirements of:

• **BS 6229** Flat roofs with continuously supported flexible waterproof coverings - Code of practice

BS 8217 Reinforced bitumen membranes for roofing - Code of practice
 BS 8000-0 Workmanship on construction sites - Introduction and general principles
 BS 8000-4 Workmanship on building sites - Code of practice for waterproofing

LRWA Design Guide for Specifiers

• **S2T** Safe to Torch

• GRO Code of Best Practice
