

Fire Service College

Project Size: **350m²**
Project Type: **Refurbishment**
Industry: **Public Sector**
Application: **Flat roofs**
System: **Proteus Pro-Felt®
Ultima Plus**

Project Overview

After being approached by its Approved Contractor, Proteus Waterproofing® carried out a detailed roof survey and provided a bespoke specification for roof works for the refurbishment of an accommodation block at the Fire Service's National Training College - the building to be used as accommodation for firemen attending training courses from across the country.

Key Challenges & Solutions

The survey showed the existing felt waterproofing had been repaired multiple times and was at the end of its serviceable life.

The existing felt covering along with protective solar chippings were removed back to the original asphalt

waterproof covering. A new Proteus Pro-Felt® Ultima Plus build-up roof was installed which included Proteus Pro-Therm insulation to meet the current Building Regulations for roof insulation.

All the works were delivered to the highest standards by Proteus approved Contractor.
