

The Grange, Sevenoaks, Kent

Project Size: **285m²**
 Project Type: **Refurbishment**
 Industry: **Residential**
 Application: **Flat roofs**
 System: **Proteus Pro-Felt®
 Pro-BW® Plus &
 Proteus Pro-Therm PIR**

Project Overview

Located in Sevenoaks, Kent, this residential property required a thermal upgrade and a new long term waterproofing solution. Proteus Waterproofing® were asked to provide insulation and waterproofing products to best protect the building.

Key Challenges & Solutions

- Low Upstands:** Due to existing skylights which were set to remain in place, the design team at Proteus Waterproofing® planned an insulation scheme with reduced depths of Pro-Therm PIR to accommodate the surrounding upstand heights.

- Multiple Roof Areas:** A range of solutions were required to accommodate the requirements of different roof areas. Pro-BW plus was used as an overlay system on the balcony area whilst Proteus Pro-Felt® Ultima Plus with Proteus Pro-Therm insulation was used on the warm roof areas of the building.

Conclusion

Regular site visits were made by Proteus Waterproofing®'s technical team to ensure a high standard of installation at each stage of the project. On completion a guarantee was put in place on the completed works to provide security and support.
