

Wembley Police Station

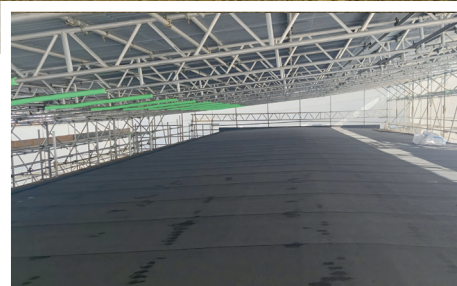

Project Size: **250m²**

Project Type: **Refurbishment**

Industry: **Government facility**

Application: **Flat roofs**

System: **Proteus Pro-Felt®
& Proteus Pro-Cold®**

Project Overview

Forming part of the Metropolitan Police district, the main roof area of Wembley Police Station was experiencing significant leaks, causing numerous issues for a key operational police station. The lower roof was also leaking, despite being recently renewed by another contractor. Proteus Waterproofing® was commissioned to provide a new waterproofing system to the main roof. The roof was stripped back to the deck and a new Proteus Ultima Plus felt system installed incorporating Proteus Pro-Them PIR insulation to meet current Building Regulations requirements. The lower roof was overlaid with Proteus Pro-Cold® a cold applied reinforced elastomer liquid applied system. Both system designed to provide long term piece of mind from further roof leaks.

Key Challenges & Solutions

The main challenge was working at a fully operational police station. Well planned coordination for logistics and site visits was required to ensure minimal disruption to the day to day running of the site.

Conclusion

The technical team at Proteus Waterproofing® was always on hand to help with any questions regarding all aspects of the installation. Regular site visits were made by our technical team to ensure the project ran smoothly.
